and on the MBAC website [www.mbacfert.com](http://www.mbacfert.com)

## About MBAC Fertilizer Corp.

MBAC Fertilizer Corp. is focused on becoming a significant integrated producer of phosphate and potash fertilizer in the Brazilian market. In October 2008, MBAC indirectly acquired all of Itafós Mineração Ltda (“Itafós”), which holds a 100% interest in the Itafós phosphate mine and related infrastructure (the “Arraias-Campos Belos Project”). MBAC has also recently expanded its property portfolio in Brazil with the acquisition of two potash exploration projects and one additional phosphate exploration project. MBAC is continuing to search for additional fertilizer opportunities in the Brazilian and other Latin-American markets. Strong agricultural fundamentals in Latin-America combined with unique opportunities in Brazil are expected to provide attractive growth opportunities for MBAC.
